A two week certificate program on **Clinical Data Management (CDM)** for **IV B. PHARMACY** and **V Pharm.D** students by the resource person from . Clinical Data Management (CDM) is a critical phase in clinical research, which leads to generation of high-quality, reliable, and statistically sound data from clinical trials. This helps to produce a drastic reduction in time from drug development to marketing. Based on the industry need currently this program was organized for the 4th b. Pharm & 5th pharm.D. Totally 79 students participated in this training program. All the students actively participated. Upon completion of the program the students were able to understand the following objectives and learning outcomes.

Objectives:

1. Define best practices as they apply to CDM processes.
2. Describe CDM processes from study start-up to database lock.
3. Apply best practice rationale when assessing data collection requirements/instruments.
4. Evaluate the benefits of standardization in establishing CDM processes.
